Copy sweep: board wording

12 October 2026. Every line of on-screen wording was read, 598 in all. 167 sound off. Each one is below, as it reads now and as it would read. Nothing changes on the board until you say so.

The worst ones

Now	Would read
No one thing named for this day. Pick it before the day picks for you.	No one thing set for this day. Pick one.
Here is the whole of it	Here's where things stand
Nothing fighting. Go.	No conflicts.
Nothing here is a grade. It is the only way the audit knows what really happened.	This just records what happened.
Logged. The ladder moves on.	Logged. On to the next follow-up.
How this thing is wired	How it works
The line answered in a shape this page does not know how to read.	Got a reply this page could not read.
Could not load your projects. This is a failed read, not an empty board.	Couldn't load your projects. They are not gone. Reload to try again.

All 167, in order down the board

Now	Would read
Your change is still on this screen only. The saved record did not update.	Not saved. This change only shows here.
Written, but this board may be showing the old view for a minute.	Saved. The board may take a minute to update.
No one thing named for this day. Pick it before the day picks for you.	No one thing set for this day. Pick one.
This page cannot reach the weather service directly, and no forecast	The weather service is not reachable, and no forecast
Move it along	Change status
This only changes how the Dashboard splits your week into two. Nothing here touches Google Calendar.	Only changes how the Dashboard splits your week. Google Calendar is not affected.
Say it the way you would say it out loud	Write it in your own words
Quiet for a week.	Hidden for a week.
Nothing changed, that date did not read.	Nothing changed. That date was not recognized.
Here is the whole of it	Here's where things stand

Now	Would read
It was all carried. Clear the small stuff and start from what is real.	Everything was carried. Clear the small stuff and start fresh.
Nothing is stuck on anybody.	Nothing is waiting on anyone.
Recorded. That reason is what the win history is built from.	Saved. It feeds your win history.
Nothing marked paid in the last six months, so there is nothing to draw.	No payments marked in the last six months.
Nothing marked off yet, so there is nothing to plot.	Nothing marked off yet.
Six weeks. Orange landed, blue carried, grey never closed out.	Last six weeks. Orange done, blue carried, grey not closed.
Nothing is stored about them yet, only their name off the calendar	Only their name from the calendar so far
Nothing archived. Archive a project from its own Edit prompt when it is finished with.	Nothing archived. To archive a project, open Edit on it.
Noted. The run up will show.	Noted. Prep and travel time will show.
Noted. You will get a join nudge.	Noted. You will get a reminder to join.
Stop counting this. It comes back if the condition returns after a week.	Hide this for a week. It comes back if it happens again.
If it collapses:	Small version:
The day blew up	Replan the day
The page you walk into the sync with	Bring this to the team sync
Brief copied. Paste it wherever the team reads.	Brief copied.
Could not reach the clipboard from inside this page.	Could not copy to the clipboard.
Auburn, for the week you are looking at. The week ahead, from today, is on Home.	Auburn, for the selected week. The week ahead from today is on Home.
The forecast is not reachable from inside this page, so only the load is shown.	Forecast unavailable. Showing load only.
What the checks turned up	Check results
If it collapses	Small version
Put this away	Dismiss
How the week actually went	How the week went
These are the dates you marked. Nothing here is reconciled against an account.	Dates you marked. Not checked against any account.
Swap the row between pushing it later and pulling it earlier	Switch between later and earlier
That is more blocks than this moves at once. Try it without everything after it.	Too many blocks to move at once. Try it without the blocks after it.

Now	Would read
That did not go through, so everything was put back where it was.	That did not go through. Everything is back where it was.
There is nowhere to leave for on that one.	That one has no place to leave for.
There is no room in front of that one for a leave by block.	No room before that one for a leave-by block.
Google Calendar is not answering, so nothing can be worked out right now.	Google Calendar is not responding, so this cannot be planned right now.
Nothing to move. The day already sits right.	Nothing to move. The day already fits.
Google last answered	Google last responded
One thing to tell me	One thing to check
Already gone by this morning:	Already passed this morning:
Google Calendar stopped answering while that was open. Nothing moved.	Google Calendar stopped responding while that was open. Nothing moved.
That had been open a while, so it is worked out again on the day as it is now. Nothing moved.	That was open a while, so it has been updated for the day as it is now. Nothing moved.
Nothing fighting. Go.	No conflicts.
Counted from blocks that name them. Whatever they do that is not on your board is not in here.	Counted from blocks that name them. Work off the board is not included.
Write anything here as it lands. It saves itself. Come back and pull the lines out when you have the head for it.	Write anything here. It saves automatically. Pull the lines out when you are ready.
On the waiting list under	Waiting on
That would not save.	Could not save that.
There are no projects on the board to hang it on yet.	No projects yet to add it to.
Linked, open the source	Open the original
It is a waiting on	Waiting on someone
Trimmed to 90. That is the rule.	Trimmed to the 90 minute limit.
Messages is not wired into this page yet. Ask me from the Claude desktop app on your Mac.	Messages is not connected here yet. Ask from the Claude desktop app on your Mac.
Nothing came back cleanly. Try again.	Something went wrong. Try again.
All of it landed	Mark all done
Did not happen	Not done
That is every open day closed.	All open days closed.
Draft a chase	Draft a follow-up
They got back to me	They replied

Now	Would read
Nothing here is a grade. It is the only way the audit knows what really happened.	This just records what happened.
Mark the rest as landed	Mark the rest done
That is saved. The screen did not redraw, so reload when you can.	Saved. Reload to see the change.
The audit did not come back. Try again.	That did not load. Try again.
Actually done	Done after all
Stop the audit	End review
Times nobody has confirmed	Unconfirmed times
Dates that do not move	Fixed dates
Logged. The ladder moves on.	Logged. On to the next follow-up.
No more chases on	No more follow-ups for
Nothing has closed yet. The first lead you mark won or lost starts this off.	No closed leads yet. Mark one won or lost to start.
You called this one	You marked this
How you actually do	Your track record
These two are on top of each other	These two overlap
No gap big enough this week. Open the day and decide which one gives.	No open slot this week. Open the day to choose which one moves.
Staged. Approve it in the queue and it goes on the calendar.	Added to the queue. Approve it to put it on the calendar.
What a day of yours is worth. Blank and your time costs nothing.	Your day rate. Leave blank to count time as free.
Rent, software, phone. Blank leaves every margin gross.	Rent, software, phone. Leave blank to show gross margins.
One per line. Blank if nothing may.	One per line. Leave blank for none.
hints, not rules	Suggestions only
These change what gets suggested and what the recap notices. Nothing here raises an alert on its own.	These shape suggestions and the recap. They never trigger alerts.
Nothing saved, no rock given.	Nothing saved. No rock entered.
No rocks set. Three at most, and only the ones that actually have to be true.	No rocks yet. Set up to three.
Booked is won work. Collected is money recorded as received. Neither one is what is in the account, and Evolve does not keep your books.	Booked is won work. Collected is payments recorded. Neither is your bank balance, and Evolve does not do your bookkeeping.
How this thing is wired	How it works

Now	Would read
The standing checks moved in here. They run on their own and what they find shows up in Need You, not on a page you have to visit.	Standing checks now live here. They run on their own, and anything they find shows up in Needs you.
Why a connector is not answering	Connector troubleshooting
The capture line	Quick capture
Does the writer actually write	Calendar write test
The rules this board runs by	Board rules
The dates that do not move, which this reads	Fixed dates this check uses
That time is not set up anywhere yet. Nothing in this page keeps a clock, so it runs only when you run it.	No schedule set up yet. It only runs when you run it.
The line answered in a shape this page does not know how to read.	Got a reply this page could not read.
Nothing waiting on the line.	No new captures.
Ask about the week, or tell me what to move. I read all six calendars, do the time zone maths, and hand back dated blocks for you to approve. Nothing reaches Google until you press approve.	Ask about the week, or tell me what to move. I read all six calendars, handle time zones, and suggest dated blocks for you to approve. Nothing goes to Google until you approve it.
Everything this board has written	Changes made to your calendar
Nothing has been written to your calendar from this board yet. When something is, it lands here with a way to put it back.	Nothing from here has been added to your calendar yet. When it is, it shows here with a way to undo it.
Nothing saved, nothing to do.	Nothing saved.
Paid comes from recording a payment. State left as	To mark it paid, record a payment. Status left as
When the next project has to land	When you need the next project
Add what it costs to run, business and personal, and this works out when the next project has to land.	Add what it costs to run, business and personal, to see when you need the next project.
What is owed and what has landed	Owed and received
Out and not paid	Sent, not paid
against what you invoiced. Thinnest first. No overhead in any of these.	vs. invoiced, lowest margin first. Overhead not included.
Nothing to compare yet. A job needs either logged time with a rate behind it, or an expense, or an invoice.	Nothing to compare yet. Add logged time with a rate, an expense, or an invoice to a job.
These are the numbers you type in. Nothing here reads your bank or your accounting, so it is only as right as the last time you updated it.	Based on what you enter. Nothing here reads your bank or accounting, so it is only as current as your last update.
Nothing matches this view today. That is usually good news.	Nothing matches this view today.

Now	Would read
Work Orders, what is due from you and when	Work Orders due from you
Mark this move done and name the next one	Done, set the next move
A template needs a project name to hang the tasks off.	Add a project name to use this template.
That delivery date did not read as a date, so nothing was created.	Couldn't read that delivery date. Nothing was created.
That project has no dated deliverables, so there is no shape to save.	This project has no dated deliverables to save.
There is no project to copy a shape from yet.	No projects to copy from yet.
The three that matter most	Top three
Who is around, what is out with them	Who's around and what they have
Capacity is counted off the hours they actually work, never guessed. Nothing they do away from your board is in here.	Capacity is based on the hours they actually work. Work outside this board isn't included.
asks, by who has them	Requests by person
A save is already waiting on you.	One save is already waiting for your OK.
Nothing here goes on the calendar. Nothing is sent.	This won't add to your calendar or send anything.
No fields read from this. It gets caught exactly as written.	No fields found. It will be saved exactly as written.
That one is needed. Change the line instead.	This one is required. Edit the line instead.
Anything in your head. One thing per line, it all gets caught and sorted later.	Whatever's on your mind. One item per line. Sort it later.
A line can also start with lead, waiting, invoice, next, task, schedule or outcome, or idea:, note:, link:, remember:. A day and a time with nothing else in front, like “dentist tomorrow at 2”, proposes a calendar event. What it reads shows up underneath as chips, and only what you can see there gets saved.	Start a line with lead, waiting, invoice, next, task, schedule or outcome, or with idea:, note:, link: or remember:. A day and time on their own, like “dentist tomorrow at 2”, suggest a calendar event. Anything detected shows below as chips, and only what shows there is saved.
That is a long one. It gets caught exactly as written. Nothing reads it unless you ask.	Long entry. It will be saved exactly as written and left alone unless you ask.
That one is a change to the day. It opens as something to look at, and nothing is written from here.	This looks like a schedule change. It opens for review, and nothing is saved from here.
That reads as a timer command. It runs right away when you catch it.	This looks like a timer command. It runs as soon as you catch it.
That could be a calendar change or a timer command. You will be asked which when you catch it.	This could be a calendar change or a timer command. You'll choose when you catch it.
Caught, exactly as written.	Saved exactly as written.
An entry was left running	A timer is still running
That was a mistake	Delete it

Now	Would read
When did it actually end	When did it end?
Nothing to continue. Nothing has been stopped yet.	No stopped timer to resume.
The calendar, or the timer	Calendar or timer?
That overlap is not a simple trim. Adjust one of the two by hand.	This overlap can't be trimmed automatically. Adjust one entry by hand.
how long before a running timer gets asked about	when to check on a long timer
Past this many hours, or once it crosses 3 in the morning, a running timer asks if it should keep going, get adjusted, or stop. It asks at most twice for the same entry.	After this many hours, or after 3 AM, a running timer asks whether to keep going, adjust or stop. It asks at most twice per entry.
Could not load your projects. This is a failed read, not an empty board.	Couldn't load your projects. They are not gone. Reload to try again.
Nothing on the board yet. Add a project, or tag a calendar block PROJECT followed by a middot.	No projects yet. Add one, or start a calendar block with “PROJECT ·”.
Record who this is for	Add client
Open the board to put a block down	Open the board to add a block
Nothing is late, blocked or waiting past a week on this one.	Nothing blocked or waiting over a week.
The playbook follows the kind of job. Pick one in the header above and its phases and checklists load here. Until then this is the general four step version.	Pick a job type above to load its phases and checklists. Until then, this is the general four-step version.
It is not built yet.	Not available yet.
Who signs, who reviews and who pays are all blank.	No signer, reviewer or payer set.
No open tasks, so nobody is holding anything here.	No open tasks.
Nothing logged. A decision written here stops getting reopened.	No decisions logged yet.
Nothing recorded yet. Moves you make on this project land here.	No activity yet. Changes you make to this project show up here.
from the nightly read	from the nightly review
This is a line the nightly read wrote, not a task yet. It has no owner, no date and no status until you make it one.	This came from the nightly review. Make it a task to give it an owner, date and status.
Nothing is late, blocked or waiting past a week.	Nothing blocked or waiting over a week.
Nothing on this project carries a date inside the next week.	Nothing on this project is dated in the next week.
Nothing has moved on the record yet.	No activity yet.
Nothing added, it had no name.	Nothing added. Give it a name first.
That date did not read, so nothing was added.	Couldn't read that date. Nothing was added.
The nightly read lists	The nightly review lists

Now	Would read
Nothing to draw yet. Add a task or a milestone above and it lands here, in Calendar, on Home and in Work at once.	No tasks or milestones yet. Add one above and it shows here, in Calendar, on Home and in Work.
A suggestion, not a plan: the	Suggested: the
No milestones yet. A milestone is one record. It shows on the timeline, the calendar, Home and any deliverable it belongs to.	No milestones yet. Each one shows on the timeline, the calendar, Home and its deliverable.
No tasks on this project yet. Type one above. A task carries an owner, a start and a due date, what it waits on, and the deliverable and milestone it serves.	No tasks yet. Add one above to set an owner, dates, what it waits on, and its deliverable and milestone.
Nothing is listed yet. Each deliverable is its own record with a brief, its tasks, every version that went to the client, the feedback and the sign off.	No deliverables yet. Each one holds its brief, tasks, client versions, feedback and sign off.
No deliverables are listed, so there is no scope on record for this project.	No deliverables yet, so this project has no scope on record.
Files are not built yet. Paste a link in the notes above and it stays with this task.	File uploads aren't available yet. Paste a link in the notes above instead.
Every time this goes to the client is a version.	Each send to the client is a version.
That is not built yet.	Not available yet.
Nothing recorded yet. State changes, versions and sign off land here.	No activity yet. Status changes, versions and sign off show up here.
Every field, and delete	Edit all fields or delete

Kept the same on purpose

Your approved words stay: Close the day, Catch up, carried, Needs you, Overview, People, Log, Inbox. Wording Claude writes for you each morning is not in here, it comes from the morning task. That task can get the same rules if you want.
